

ASHBi Seminar List

No.	Date	Speaker	Position/Affiliation	Title
1	Jul 3, 19	Taro Tsujimura	Research Assistant Professor/Keio University School of Medicine	Controlling gene activation by enhancers through a drug-inducible topological insulator
2	Jul 5, 19	Yu Kitadate	The National Institute for Basic Biology (NIBB), National Institutes of Natural Sciences	Mitogen competition regulates spermatogenic stem cell homeostasis in an open niche
3	Jul 26, 19	Agata Zielinska	MD-PhD student/Max Planck Institute, University of Cambridge	Seeing is believing: new insights into causes of aneuploidy in mouse and human eggs
4	Aug 7, 19	Ryo Yamamoto	Research associate/ Stanford University School of Medicine	Single cell transplantation assay unveiled a novel model of hematopoiesis
5	Aug 26, 19	Masato Kanemaki	National Institute of Genetics	Rapid protein depletion by the auxin-inducible degron technology and an application to study genome maintenance in human cells
6	Sep 10, 19	Jacek Majewski	Associate Professor/McGill University, Genome Quebec Innovation Centre	Exploring the Downstream Effects of Epigenetic Driver Mutations in Cancer: Disease informs Basic Science
7	Sep 11, 19	Kei Igarashi	Assistant Professor/University of California, Irvine	Circuit dynamics of the entorhinal cortex in associative learning and in Alzheimer's disease
8	Sep 17, 19	Peter Janssen	Professor/The Leuven Brain Institute	The cortical network processing three-dimensional object structure in the human and nonhuman primate brain
9	Sep 27, 19	Wim Vanduffel	Professor/The Leuven Brain Institute	Optogenetic interrogation of the attention network in primates
10	Oct 15, 19	Aris N. Economides	Vice President -Research/Regeneron Pharmaceuticals, Inc.	Cracking the Code of Rare Diseases: Understanding Mechanisms and Developing New Therapies
11	Oct 28, 19	Konstantin Mischaikow	Professor, The State University of New Jersey	DSGRN: an efficient tool for understanding regulatory networks
12	Nov 18, 19	Ziad Hafed	Professor, University of Tübingen, Germany	Perceptual saccadic suppression starts in the retina
13	Nov 18, 19	Hans-Peter Thier	Professor, University of Tübingen	The role of the superior temporal sulcus (STS) in controlling social gaze following
14	Nov 22, 19	Xiaoqin Wang	Professor, Johns Hopkins University	Marmoset as a Model System for Studying Neural Basis of Vocal Communication
15	Dec 4, 19	Yang Zhou	Principal Investigator/Montreal Neurological Institute-Hospital, Assistant Professor/McGill University	Genetic Engineering and Neural-behavioral Phenotyping of a Macaque Model of Autism Spectrum Disorder
16	Dec 9, 19	Yuichi Taniguchi	Unit Leader/RIKEN Center for Biosystems Dynamics Research	Molecular organization of the genome
17	Dec 10, 19	Hiroshi Suzuki	Fellow/Massachusetts Institute of Technology	Uncovering the operating principles of genome through RNA biology
18	Dec 17, 19	Yasuhiro Murakawa	Team Leader/RIKEN Center for Integrative Medical Sciences	An emerging picture of functional DNA sequences in the human genome
19	Jan 24, 20	Ken-ichi Amemori	Program-Specific Associate Professor/ Kyoto University	Physiological and genetic approaches to identify primate cortico-basal ganglia structures generating anxiety
20	Feb 12, 20	Shigeki Nakagome	Ussher Assistant Professor/University of Dublin	Systematic profiling of the T cell receptor repertoire in intestinal inflammation

 Distinguished Seminar
