MAJOR TOPICS

- Human development from perspective of comparative embryology
- Pre- and peri-implantation stage human development
- Primate models of human development
- In vitro 3D reconstitution of human tissues and organs
- In vitro 3D models of human diseases
- Novel tools for in vitro reconstitution and analysis of human development

FELLOWSHIPS

We are eager to have as many young people as possible attend since they are likely to benefit most from this meeting. A number of presentations by graduate students and postdocs in this conference will be selected for major fellowship awards.
